

Table of Contents

| | |
|---|----|
| Chapter 1. Infinite Galois Theory and Profinite Groups | 1 |
| 1.1 Inverse Limits | 1 |
| 1.2 Profinite Groups | 4 |
| 1.3 Infinite Galois Theory | 9 |
| 1.4 The p -adic Integers and the Prüfer Group | 12 |
| 1.5 The Absolute Galois Group of a Finite Field | 15 |
| Exercises | 16 |
| Notes | 18 |
| Chapter 2. Valuations and Linear Disjointness | 19 |
| 2.1 Valuations, Places, and Valuation Rings | 19 |
| 2.2 Discrete Valuations | 21 |
| 2.3 Extensions of Valuations and Places | 24 |
| 2.4 Integral Extensions and Dedekind Domains | 30 |
| 2.5 Linear Disjointness of Fields | 34 |
| 2.6 Separable, Regular, and Primary Extensions | 38 |
| 2.7 The Imperfect Degree of a Field | 44 |
| 2.8 Derivatives | 48 |
| Exercises | 50 |
| Notes | 51 |
| Chapter 3. Algebraic Function Fields of One Variable | 52 |
| 3.1 Function Fields of One Variable | 52 |
| 3.2 The Riemann-Roch Theorem | 54 |
| 3.3 Holomorphy Rings | 56 |
| 3.4 Extensions of Function Fields | 59 |
| 3.5 Completions | 61 |
| 3.6 The Different | 67 |
| 3.7 Hyperelliptic Fields | 70 |
| 3.8 Hyperelliptic Fields with a Rational quadratic Subfield | 73 |
| Exercises | 75 |
| Notes | 76 |
| Chapter 4. The Riemann Hypothesis for Function Fields | 77 |
| 4.1 Class Numbers | 77 |
| 4.2 Zeta Functions | 79 |
| 4.3 Zeta Functions under Constant Field Extensions | 81 |
| 4.4 The Functional Equation | 82 |
| 4.5 The Riemann Hypothesis and Degree 1 Prime Divisors | 84 |
| 4.6 Reduction Steps | 86 |
| 4.7 An Upper Bound | 87 |
| 4.8 A Lower Bound | 89 |

| | |
|--|-----|
| Exercises | 91 |
| Notes | 93 |
| | |
| Chapter 5. Plane Curves | 95 |
| 5.1 Affine and Projective Plane Curves | 95 |
| 5.2 Points and prime divisors | 97 |
| 5.3 The Genus of a Plane Curve | 99 |
| 5.4 Points on a Curve over a Finite Field | 104 |
| Exercises | 105 |
| Notes | 106 |
| | |
| Chapter 6. The Chebotarev Density Theorem | 107 |
| 6.1 Decomposition Groups | 107 |
| 6.2 The Artin Symbol over Global Fields | 111 |
| 6.3 Dirichlet Density | 113 |
| 6.4 Function Fields | 114 |
| 6.5 Number Fields | 121 |
| Exercises | 129 |
| Notes | 130 |
| | |
| Chapter 7. Ultraproducts | 132 |
| 7.1 First Order Predicate Calculus | 132 |
| 7.2 Structures | 134 |
| 7.3 Models | 135 |
| 7.4 Elementary Substructures | 137 |
| 7.5 Ultrafilters | 138 |
| 7.6 Regular Ultrafilters | 139 |
| 7.7 Ultraproducts | 141 |
| 7.8 Regular Ultraproducts | 145 |
| 7.9 Nonprincipal Ultraproducts of Finite Fields | 147 |
| Exercises | 147 |
| Notes | 148 |
| | |
| Chapter 8. Decision Procedures | 149 |
| 8.1 Deduction Theory | 149 |
| 8.2 Gödel's Completeness Theorem | 152 |
| 8.3 Primitive Recursive Functions | 154 |
| 8.4 Primitive Recursive Relations | 156 |
| 8.5 Recursive Functions | 157 |
| 8.6 Recursive and Primitive Recursive Procedures | 159 |
| 8.7 A Reduction Step in Decidability Procedures | 160 |
| Exercises | 161 |
| Notes | 162 |

| | |
|--|-----|
| Chapter 9. Algebraically Closed Fields | 163 |
| 9.1 Elimination of quantifiers | 163 |
| 9.2 A quantifiers elimination procedure | 165 |
| 9.3 Effectiveness | 168 |
| 9.4 Applications | 169 |
| Exercises | 170 |
| Notes | 170 |
| Chapter 10. Elements of Algebraic Geometry | 172 |
| 10.1 Algebraic Sets | 172 |
| 10.2 Varieties | 175 |
| 10.3 Substitutions in Irreducible Polynomials | 176 |
| 10.4 Rational Maps | 178 |
| 10.5 Hyperplane Sections | 180 |
| 10.6 Descent | 182 |
| 10.7 Projective Varieties | 185 |
| 10.8 About the Language of Algebraic Geometry | 187 |
| Exercises | 190 |
| Notes | 191 |
| Chapter 11. Pseudo Algebraically Closed Fields | 192 |
| 11.1 PAC Fields | 192 |
| 11.2 Reduction to Plane Curves | 193 |
| 11.3 The PAC Property is an Elementary Statement | 199 |
| 11.4 PAC Fields of Positive Characteristic | 201 |
| 11.5 PAC Fields with Valuations | 203 |
| 11.6 The Absolute Galois Group of a PAC Field | 206 |
| 11.7 A non-PAC Field K with K_{ins} PAC | 211 |
| Exercises | 216 |
| Notes | 217 |
| Chapter 12. Hilbertian Fields | 218 |
| 12.1 Hilbert Sets and Reduction Lemmas | 218 |
| 12.2 Hilbert Sets under Separable Algebraic Extensions | 222 |
| 12.3 Purely Inseparable Extensions | 223 |
| 12.4 Imperfect fields | 227 |
| Exercises | 228 |
| Notes | 229 |
| Chapter 13. The Classical Hilbertian Fields | 230 |
| 13.1 Further Reduction | 230 |
| 13.2 Function Fields over Infinite Fields | 235 |
| 13.3 Global Fields | 236 |
| 13.4 Hilbertian Rings | 240 |
| 13.5 Hilbertianity via Coverings | 243 |

| | |
|---|-----|
| 13.6 Non-Hilbertian g -Hilbertian Fields | 247 |
| 13.7 Twisted Wreath Products | 251 |
| 13.8 The Diamond Theorem | 257 |
| 13.9 Weissauer's Theorem | 261 |
| Exercises | 263 |
| Notes | 265 |
| Chapter 14. Nonstandard Structures | 266 |
| 14.1 Higher Order Predicate Calculus | 266 |
| 14.2 Enlargements | 267 |
| 14.3 Concurrent Relations | 269 |
| 14.4 The Existence of Enlargements | 271 |
| 14.5 Examples | 273 |
| Exercises | 274 |
| Notes | 275 |
| Chapter 15. Nonstandard Approach | |
| to Hilbert's Irreducibility Theorem | 276 |
| 15.1 Criteria for Hilbertianity | 276 |
| 15.2 Arithmetical Primes Versus Functional Primes | 278 |
| 15.3 Fields with the Product Formula | 280 |
| 15.4 Generalized Krull Domains | 282 |
| 15.5 Examples | 285 |
| Exercises | 288 |
| Notes | 289 |
| Chapter 16. Galois Groups over Hilbertian Fields | 290 |
| 16.1 Galois Groups of Polynomials | 290 |
| 16.2 Stable Polynomials | 293 |
| 16.3 Regular Realization of Finite Abelian Groups | 297 |
| 16.4 Split Embedding Problems with Abelian Kernels | 301 |
| 16.5 Embedding Quadratic Extensions in $\mathbb{Z}/2^n\mathbb{Z}$ -extensions | 305 |
| 16.6 \mathbb{Z}_p -Extensions of Hilbertian Fields | 307 |
| 16.7 Symmetric and Alternating Groups over Hilbertian Fields | 314 |
| 16.8 GAR-Realizations | 320 |
| 16.9 Embedding Problems over Hilbertian Fields | 324 |
| 16.10 Finitely Generated Profinite Groups | 327 |
| 16.11 Abelian Extensions of Hilbertian Fields | 331 |
| 16.12 Regularity of Finite Groups over Complete Discrete Valued Fields | 333 |
| Exercises | 334 |
| Notes | 335 |
| Chapter 17. Free Profinite Groups | 337 |
| 17.1 The Rank of a Profinite Group | 337 |

| | |
|--|-----|
| 17.2 Profinite Completions of Groups | 339 |
| 17.3 Formations of Finite Groups | 342 |
| 17.4 Free pro- \mathcal{C} Groups | 345 |
| 17.5 Subgroups of Free Discrete Groups | 349 |
| 17.6 Open Subgroups of Free Profinite Groups | 357 |
| 17.7 An Embedding Property | 359 |
| Exercises | 360 |
| Notes | 361 |
| Chapter 18. The Haar Measure | 362 |
| 18.1 The Haar Measure of a Profinite Group | 362 |
| 18.2 Existence of the Haar Measure | 365 |
| 18.3 Independence | 369 |
| 18.4 Cartesian Product of Haar Measures | 375 |
| 18.5 The Haar Measure of the Absolute Galois Group | 377 |
| 18.6 The PAC Nullstellensatz | 379 |
| 18.7 The Bottom Theorem | 381 |
| 18.8 PAC Fields over Uncountable Hilbertian Fields | 385 |
| 18.9 On the Stability of Fields | 389 |
| 18.10 PAC Galois Extensions of Hilbertian Fields | 393 |
| 18.11 Algebraic Groups | 396 |
| Exercises | 398 |
| Notes | 399 |
| Chapter 19. Effective Field Theory and Algebraic Geometry | 401 |
| 19.1 Presented Rings and Fields | 401 |
| 19.2 Extensions of Presented Fields | 404 |
| 19.3 Galois Extensions of Presented Fields | 409 |
| 19.4 The Algebraic and Separable Closures of Presented Fields | 410 |
| 19.5 Constructive Algebraic Geometry | 411 |
| 19.6 Presented Rings and Constructible Sets | 420 |
| 19.7 Basic Normal Stratification | 423 |
| Exercises | 425 |
| Notes | 426 |
| Chapter 20. The Elementary Theory of e -Free PAC Fields | 427 |
| 20.1 \aleph_1 -Saturated PAC Fields | 427 |
| 20.2 The Elementary Equivalence Theorem of \aleph_1 -Saturated PAC Fields | 428 |
| 20.3 Elementary Equivalence of PAC Fields | 431 |
| 20.4 On e -Free PAC Fields | 434 |
| 20.5 The Elementary Theory of Perfect e -Free PAC Fields | 436 |
| 20.6 The Probable Truth of a Sentence | 438 |
| 20.7 Change of Base Field | 440 |
| 20.8 The Fields $K_s(\sigma_1, \dots, \sigma_e)$ | 442 |

| | |
|--|-----|
| 20.9 The Transfer Theorem | 444 |
| 20.10 The Elementary Theory of Finite Fields | 446 |
| Exercises | 449 |
| Notes | 451 |
| Chapter 21. Problems of Arithmetical Geometry | 452 |
| 21.1 The Decomposition-Intersection Procedure | 452 |
| 21.2 C_i -Fields and Weakly C_i -Fields | 453 |
| 21.3 Perfect PAC Fields which are C_i | 458 |
| 21.4 The Existential Theory of PAC Fields | 460 |
| 21.5 Kronecker Classes of Number Fields | 461 |
| 21.6 Davenport's Problem | 465 |
| 21.7 On permutation Groups | 470 |
| 21.8 Schur's Conjecture | 477 |
| 21.9 Carlitz-Wan Conjecture | 487 |
| Exercises | 490 |
| Notes | 493 |
| Chapter 22. Projective Groups and Frattini Covers | 494 |
| 22.1 The Frattini Groups of a Profinite Group | 494 |
| 22.2 Cartesian Squares | 496 |
| 22.3 On \mathcal{C} -Projective Groups | 499 |
| 22.4 Projective Groups | 503 |
| 22.5 Frattini Covers | 505 |
| 22.6 The Universal Frattini Cover | 510 |
| 22.7 Projective Pro- p -Groups | 512 |
| 22.8 Supernatural Numbers | 517 |
| 22.9 The Sylow Theorems | 519 |
| 22.10 On Complements of Normal Subgroups | 521 |
| 22.11 The Universal Frattini p -Cover | 525 |
| 22.12 Examples of Universal Frattini p -Covers | 529 |
| 22.13 The Special Linear Group $SL(2, \mathbb{Z}_p)$ | 531 |
| 22.14 The General Linear Group $GL(2, \mathbb{Z}_p)$ | 534 |
| Exercises | 536 |
| Notes | 539 |
| Chapter 23. PAC Fields and Projective Absolute Galois Groups | 541 |
| 23.1 Projective Groups as Absolute Galois Groups | 541 |
| 23.2 Countably Generated Projective Groups | 543 |
| 23.3 Perfect PAC Fields of Bounded Corank | 546 |
| 23.4 Basic Elementary Statements | 547 |
| 23.5 Reduction Steps | 551 |
| 23.6 Application of Ultraproducts | 555 |
| Exercises | 558 |
| Notes | 558 |

| | |
|---|-----|
| Chapter 24. Frobenius Fields | 559 |
| 24.1 The Field Crossing Argument | 559 |
| 24.2 The Beckmann-Black Problem | 562 |
| 24.3 The Embedding Property and Maximal Frattini Covers | 564 |
| 24.4 The Smallest Embedding Cover of a Profinite Group | 566 |
| 24.5 A Decision Procedure | 571 |
| 24.6 Examples | 573 |
| 24.7 Non-projective Smallest Embedding Cover | 576 |
| 24.8 A Theorem of Iwasawa | 578 |
| 24.9 Free Profinite Groups of at most Countable Rank | 580 |
| 24.10 Application of the Nielsen-Schreier Formula | 583 |
| Exercises | 588 |
| Notes | 589 |
| Chapter 25. Free Profinite Groups of Infinite Rank | 591 |
| 25.1 Characterization of Free Profinite Groups by Embedding Problems | 592 |
| 25.2 Applications of Theorem 25.1.7 | 598 |
| 25.3 The Pro- \mathcal{C} Completion of a Free Discrete Group | 601 |
| 25.4 The Group Theoretic Diamond Theorem | 603 |
| 25.5 The Melnikov Group of a Profinite Group | 610 |
| 25.6 Homogeneous Pro- \mathcal{C} Groups | 612 |
| 25.7 The S -rank of Closed Normal Subgroups | 617 |
| 25.8 Closed Normal Subgroups with a Basis Element | 620 |
| 25.9 Accessible Subgroups | 622 |
| Notes | 630 |
| Chapter 26. Random Elements in Free Profinite Groups | 632 |
| 26.1 Random Elements in a Free Profinite Group | 632 |
| 26.2 Random Elements in Free pro- p Groups | 637 |
| 26.3 Random e -tuples in $\hat{\mathbb{Z}}^n$ | 639 |
| 26.4 On the Index of Normal Subgroups Generated by Random Elements | 643 |
| 26.5 Freeness of Normal Subgroups Generated by Random Elements | 648 |
| Notes | 652 |
| Chapter 27. Omega-Free PAC Fields | 652 |
| 27.1 Model Companions | 652 |
| 27.2 The Model Companion in an Augmented Theory of Fields . . | 656 |
| 27.3 New Non-Classical Hilbertian Fields | 661 |
| 27.4 An abundance of ω -Free PAC Fields | 664 |
| Notes | 667 |

| | |
|---|-----|
| Chapter 28. Undecidability | 668 |
| 28.1 Turing Machines | 668 |
| 28.2 Computation of Functions by Turing Machines | 669 |
| 28.3 Recursive Inseparability of Sets of Turing Machines | 673 |
| 28.4 The Predicate Calculus | 676 |
| 28.5 Undecidability in the Theory of Graphs | 679 |
| 28.6 Assigning Graphs to Profinite Groups | 684 |
| 28.7 The Graph Conditions | 685 |
| 28.8 Assigning Profinite Groups to Graphs | 687 |
| 28.9 Assigning Fields to Graphs | 691 |
| 28.10 Interpretation of the Theory of Graphs in the Theory of Fields | 691 |
| Exercises | 694 |
| Notes | 694 |
| Chapter 29. Algebraically Closed Fields with Distinguished Automorphisms | 695 |
| 29.1 The Base Field K | 695 |
| 29.2 Coding in PAC Fields with Monadic Quantifiers | 697 |
| 29.3 The Theory of Almost all $\langle \tilde{K}, \sigma_1, \dots, \sigma_e \rangle$'s | 701 |
| 29.4 The Probability of Truth Sentences | 703 |
| Chapter 30. Galois Stratification | 705 |
| 30.1 The Artin Symbol | 705 |
| 30.2 Conjugacy Domains under Projection | 707 |
| 30.3 Normal Stratification | 712 |
| 30.4 Elimination of One Variable | 714 |
| 30.5 The Complete Elimination Procedure | 717 |
| 30.6 Model-Theoretic Applications | 719 |
| 30.7 A Limit of Theories | 722 |
| Exercises | 723 |
| Notes | 726 |
| Chapter 31. Galois Stratification over Finite Fields | 727 |
| 31.1 The Elementary Theory of Frobenius Fields | 727 |
| 31.2 The Elementary Theory of Finite Fields | 732 |
| 31.3 Near Rationality of the Zeta Function of a Galois Formula | 736 |
| Exercises | 745 |
| Notes | 747 |
| Chapter 32. Problems of Field Arithmetic | 748 |
| 32.1 Open Problems of the First Edition | 748 |
| 32.2 Open Problems | 751 |
| References | 755 |
| Index | 769 |
