Banker
What does a Banker do?

❖ Bankers are the mediators for investors and those who wish to sell their investments. When bankers accept deposits from a customer, they reinvest the amount in higher yield debt and equity instruments. They investigate the credit risk of customers applying for a loan.

❖ Bankers are responsible for establishing solid customer relationships, the planning and delivery of sales strategies or products, and monitoring their progress.
Usage of Math

- Banking is the business of managing money, and where money is involved everything must be carefully assessed, valued and measured. To that end, bankers make use of various mathematical concepts.

- All bankers must have an excellent understanding of fundamental quantitative concepts such as interest rates, represent value, and risk assessment.

Required Math: Probability and Statistics 1, Pre-Calculus, Calculus 1
Math Problem

Eric deposited $1200 into a savings account where the rate of interest was 2% annually. In one year, how much interest will he earn?

The question asks how much is 2% of $1200?

$$
\frac{1200 \times 2}{100} = \frac{2400}{100} = 24
$$

He will earn $24 in one year.

How much will he earn in 5 years?

He will earn $120 in 5 years.
