Da Motta Ferreira, João Carlos [Ferreira, J. Carlos da Motta];
Micali, Artibano (F-MONT2)
Sur la décomposition de Peirce. (French. English summary) [On the Peirce
decomposition]
Non-associative algebra and its applications (Oviedo, 1993), 106–113, Math. Appl., 303,

Summary: “The aim of this paper is to give a general theory of Peirce decomposition in
nonassociative algebras. This theory generalizes the theory of associative and alternative
algebras and also permits, among other results, the characterization of the nilradical of
a finite-dimensional algebra which is flexible and power-associative.”
