

PUBLICATION LIST

Peter Wai-Kwong Li

November, 2014

1. (with H. Donnelly) Pure point spectrum and negative curvature for noncompact manifolds. *Duke Math. J.* 46 (1979), 497–503.
2. A lower bound for the first eigenvalue of the Laplacian on a compact manifold. *Indiana Math. J.* 28 (1979), 1013–1019.
3. (with S. T. Yau) Estimates of eigenvalues of a compact Riemannian manifold. *Proc. Symp. Pure Math.* 36 (1980), 205–239.
4. (with H. Donnelly) Lower bounds for the eigenvalues of negatively curved manifolds. *Math. Z.* 172 (1980), 29–40.
5. Eigenvalue estimates on homogeneous manifolds. *Comm. Math. Helvetici* 55 (1980), 347–363.
6. On the Sobolev constant and the p -spectrum of a compact Riemannian manifold. *Ann. Sc. Ec. Norm. Sup.* 4e serie, t. 13 (1980), 451–469.
7. (with S. Y. Cheng and S. T. Yau) On the upper estimate of the heat kernel of a complete Riemannian manifold. *Amer. J. Math.* 103 (1981), 1021–1063.
8. Minimal immersions of a compact irreducible homogeneous Riemannian manifold. *J. Diff. Geom.* 16 (1981), 105–115.
9. (with J. Q. Zhong) Pinching theorem for the first eigenvalue on positively curved manifolds. *Invent. Math.* 65 (1981), 221–225.
10. (with S. Y. Cheng) Heat kernel estimates and lower bound of eigenvalues. *Comm. Math. Helvetici* 56 (1981), 327–338.
11. (with H. Donnelly) Lower bounds for the eigenvalues of Riemannian manifolds. *Mich. J. Math.* 29 (1982), 149–161.
12. Poincaré inequalities on compact manifolds. *Ann. Math. Studies* 102 (1982), 73–83.
13. (with A. Treibergs) Pinching theorem for the first eigenvalue on positively curved four-manifolds. *Invent. Math.* 66 (1982), 35–38.
14. (with S. T. Yau) A new conformal invariant and its applications to the Willmore conjecture and the first eigenvalue of compact surfaces. *Invent. Math.* 69 (1982), 269–291.
15. (with S. T. Yau) On the Schrödinger equation and the eigenvalue problem. *Comm. Math. Phys.* 88 (1983), 309–318.
16. (with R. Schoen and S. T. Yau) On the isoperimetric inequality for minimal surfaces. *Ann. Sc. Norm. Sup. Pisa* 11 (1984), 237–244.
17. (with H. Donnelly) Heat equation and compactifications of complete Riemannian manifolds. *Duke J. Math.* 51 (1984), 667–673.
18. (with R. Schoen) L^p and mean value properties of subharmonic functions on Riemannian manifolds. *Acta Math.* 153 (1984), 279–301.
19. Uniqueness of L^1 solutions for the Laplace equation and the heat equation on Riemannian manifolds. *J. Diff. Geom.* 20 (1984), 447–457.
20. (with S. Y. Cheng and S. T. Yau) Heat equations on minimal submanifolds and their applications. *Amer. J. Math.* 105 (1985), 1033–1065.
21. Function theory on complete Riemannian manifolds. *Asterisque* 132 (1985), 277–284.
22. (with K. L. Chung and R. J. Williams) Comparison of probability and classical methods of the Schrödinger equation. *Expo. Math.* 4 (1986), 271–278.
23. (with S. T. Yau) On the parabolic kernel of the Schrödinger operator. *Acta Math.* 156 (1986), 153–201.
24. Large time behavior of the heat equation on complete manifolds with non-negative Ricci curvature. *Annals Math.* 124 (1986), 1–21.
25. (with L. F. Tam) Positive harmonic functions on complete manifolds with non-negative curvature outside a compact set. *Ann. Math.* 125 (1987), 171–207.
26. (with L. F. Tam) Symmetric Green’s functions on complete manifolds. *Amer. J. Math.* 109 (1987), 1129–1154.

27. (with L. F. Tam) Linear growth harmonic functions on a complete manifold. *J. Diff. Geom.* 29 (1989), 421–425.
28. Harmonic functions on complete manifolds. “IXth International Congress on Mathematical Physics” edited by B. Simon, A. Truman, and I. M. Davies. Adam Hilger, Bristol-New York (1989), 365–368.
29. Complete manifolds which are not everywhere negatively curved. *Proc. Workshops Pure Math.* 9, Part III (1989), 193–207.
30. Harmonic maps of complete manifolds. *Proc. KIT Math. Workshop 4* (1989), 67–82.
31. On the structure of complete Kähler manifolds with nonnegative curvature near infinity. *Invent. Math.* 99 (1990), 579–600.
32. (with S. T. Yau) Curvature and holomorphic mappings of complete Kähler manifolds. *Compositio Math.* 73 (1990), 125–144.
33. (with L. F. Tam) Complete surfaces with finite total curvature. *J. Diff. Geom.* 33 (1991), 139–168.
34. (with A. Treibergs) Application of eigenvalue techniques to geometry. “Contemporary Geometry: J.-Q. Zhong Memorial Volume” edited by Hung-Hsi Wu, Plenum Press (1991), New York, 21–52.
35. Erratum “On the structure of complete Kähler manifolds with nonnegative curvature near infinity.” *Invent. Math.* 104 (1991), 447–448.
36. (with L. F. Tam) The heat equation and harmonic maps of complete manifolds. *Invent. Math.* 105 (1991), 1–46.
37. (with A. Treibergs and S. T. Yau) How to hear the volume of convex domains. *Contemporary Math.* 127 (1992), 109–117.
38. (with L. F. Tam) Harmonic functions and the structure of complete manifolds. *J. Diff. Geom.* 35 (1992), 359–383.
39. (with L. F. Tam) Uniqueness and regularity of proper harmonic maps. *Annals Math.* 136 (1992), 169–203.
40. (with S. T. Yau) Asymptotically flat complete Kähler manifolds. “Complex Geometry” Lecture notes in pure and applied mathematics 143 (1992), edited by Gen Komatsu and Yusuke Sakane, Marcel Dekker, New York-Basel-Hong Kong, 131–143.
41. The theory of harmonic functions and its relation to geometry. *Proc. Symp. Pure Math.* 54 (1993), Part 1, 307–315.
42. “Lecture Notes on Geometric Analysis.” Lecture Notes Series No. 6, Research Institute of Mathematics, Global Analysis Research Center, Seoul National University, Korea (1993).
43. (with L. F. Tam) Uniqueness and regularity of proper harmonic maps II. *Indiana U. Math. J.* 42 (1993), 591–635.
44. (with J. P. Bourguignon and S. T. Yau) Upper bound of the first eigenvalue for algebraic submanifolds. *Comm. Math. Helvetici* 69 (1994), 199–207.
45. (with L. F. Tam and J. Wang) Harmonic diffeomorphisms between Hadamard manifolds. *Transactions AMS* 347 (1995), 3645–3658.
46. (with L. F. Tam) Green’s functions, harmonic functions, and volume comparison. *J. Diff. Geom.* 41 (1995), 277–318.
47. Harmonic functions of linear growth on Kähler manifolds with non-negative Ricci curvature. *Math. Research Letters.* 2 (1995), 79–94.
48. (with G. Tian) On the heat kernel of the Bergmann metric on algebraic varieties. *Journal AMS* 8 (1995), 857–877.
49. (with M. Ramachandran) Kähler manifolds with almost non-negative Ricci curvature. *Amer. J. Math.* 118 (1996), 341–353.
50. (with R. Chen) On Poincaré type inequalities. *Transaction AMS* 349 (1997), 1561–1585.
51. (with L. F. Tam and D. G. Yang) On the elliptic equation $\Delta u + ku - Ku^p = 0$ on complete Riemannian manifolds and their geometric applications. *Transaction AMS* 350 (1998), 1045–1078.
52. Complete surfaces of at most quadratic area growth. *Comm. Math. Helvatici* 72 (1997), 1–5.
53. Harmonic sections of polynomial growth. *Math. Research Letters* 4 (1997), 35–44.
54. Curvature and function theory on Riemannian manifolds. *Surveys in Differential Geometry: Papers dedicated to Atiyah, Bott, Hirzebruch, and Singer* Vol VII, International Press, Cambridge (2000), 375–432.

55. (with J. Wang) Harmonic rough isometries into Hadamard space. *Asian J. Math.* 2 (1998), 101–125.
56. (with L. F. Tam and J. P. Wang) Sharp bounds for the Green’s function and the heat kernel. *Math. Research Letters* 4 (1997), 589–602.
57. (with J. Wang) Convex hull properties of harmonic maps. *J. Diff. Geom.* 48 (1998), 497–530.
58. (with J. Wang) Mean value inequalities. *Indiana U. Math. J.* 48 (1999), 1257–1283.
59. (with J. Wang) Counting massive sets and dimensions of harmonic functions. *J. Diff. Geom.* 53 (1999), 237–278.
60. (with J. Wang) Counting dimensions of L -harmonic functions. *Annals Math.* 152 (2000), 645–658.
61. (with J. Wang) Polynomial growth solutions of uniformly elliptic operators of non-divergence form. *Proc. AMS* 129 (2001), 3691–3699.
62. (with J. Wang) Hölder estimates and regularity for holomorphic and harmonic functions. *J. Diff. Geom.* 58 (2001), 309–329.
63. (with J. Wang) Minimal hypersurfaces with finite index. *Math. Research Letters* 9 (2002), 95–103.
64. (with J. Wang) Finiteness of disjoint minimal graphs. *Math. Research Letters* 8 (2001), 771–777.
65. (with J. Wang) Complete manifolds with positive spectrum. *J. Diff. Geom.* 58 (2001), 501–534.
66. (with J. Wang) Stable minimal hypersurfaces in a nonnegatively curved manifold. *J. Reine Angew. Math. (Crelles)* 566 (2004), 215–230.
67. Differential geometry via harmonic functions. *Proc. ICM 2002 - Beijing* Vol. II (2002), 293–302.
68. (with J. Wang) Complete manifolds with positive spectrum, II. *J. Diff. Geom.* 62 (2002), 143–162.
69. (with J. Wang) Comparison theorem for Kähler manifolds and positivity of spectrum. *J. Diff. Geom.* 69 (2005), 43–74.
70. (with J. Wang) Weighted Poincaré inequality and rigidity of complete manifolds. *Ann. Scient. Éc. Norm. Sup.* 4^e série, t. 39 (2006), 921–982.
71. (with J. Wang) Connectedness at infinity of complete Kähler manifolds. *Amer. J. Math.* 131 (2009), 771–817.
72. (with S. Kong and D. Zhou) Spectrum of the Laplacian on quaternionic Kähler manifolds. *J. Diff. Geom.* 78 (2008), 295–332.
73. Harmonic functions and applications to complete manifolds. *XIV Escola de Geometria Diferencial: Em homenagem a Shiing-Shen Chern.* (2006).
74. (with L. Ji and J. Wang) Ends of locally symmetric spaces with maximal bottom spectrum. *J. Reine Angew. Math. (Crelles)* 632 (2009), 1–35.
75. (with J. Wang) A generalization of Cheng’s theorem. *Asian J. Math.* 12 (2008), 519–526.
76. Harmonic functions on complete Riemannian manifolds. “*Handbook of Geometric Analysis, Vol. I*” Advanced Lectures in Mathematics, 7 (2008), Higher Education Press and International Press, Beijing-Boston, 195–227.
77. (with J. Wang) Counting cusps on complete manifolds of finite volume. *Math. Research Letters* 17 (2010), 675–688.
78. Structure of Complete Manifolds with Positive Spectrum. “*Surveys in Geometric Analysis and Relativity*” Advanced Lectures in Mathematics, 20 (2011), Higher Education Press and International Press, Beijing-Boston, 343–361.
79. “Geometric Analysis.” Cambridge Studies in Advanced Mathematics No. 134, Cambridge University Press, Cambridge, UK (2012).
80. (with L. Ji, K. Liu, and R. Schoen) “Selected Expository Works of Shing-Tung Yau with Commentary” Advanced Lectures in Mathematics No. 28, Vol I & II, International Press, Somerville, USA; Higher Education Press, Beijing, China (2014).
